

# Glenn Antoine

Senior Software Engineer

[home](#)[projects](#)[blog](#)[resume](#)

Since 1999 I have been running my own business in some shape or form. I develop web applications of all kind; eCommerce, Content Management Systems, Blog platforms, Simple Web Sites, WordPress Customizations, WordPress Plugins and pretty much anything else that can assist my clients in achieving their goals.

When it comes to client-side technologies I use **xHTML, HTML 5, CSS3 & JavaScript, and jQuery**. For the server-side I enjoy the use of **PHP, MySQL, Zend Framework, Linux, and Apache** most often.

However for the past few years I have been working with **C#, MSSQL, MVC4, .NET, LINQ, NHibernate, and Entity Framework**, just to name a few, for Enterprise scale applications and clients depending on those technologies.

The above is the long way of saying that, I use this place to introduce myself to the world, to write about technologies that interest me and to show some of my work.

If You have any questions for me, if You're interested in hiring me for some work, or just want to chat, [please visit my contact page here](#).
